Teachers' Resources

Teacher's Guide to Lead in Soil

- This document contains (in outline form) the basic factual information about lead necessary to knowledgeably lead class discussions and guide students' research efforts. It also indicates (by topic) relevant module segments, websites and articles provided with the curriculum. This should be read through before the teacher begins the module with the students.

How to Use This Module

- Basic instructions on using the segments of the module.

Bibliography and Websites

- Websites and articles provided for teacher/student use in further researching lead related topics.

Glossary

- Definitions are provided for scientific and conceptual terms used in the module. Teachers may want to define these terms with the students as they come up in the module or use them as a starting point of discussions relating to prior knowledge.
