"MIAMI RIVER BASIN WATER QUALITY IMPROVEMENT REPORT"
Action Item Matrix Quarterly Progress Report

Fourth Quarterly Report, 2003  
(October - December)

**Action Item:**
4. Monitoring and Research  
a. Continue monthly monitoring for water quality of Wagner Creek, Miami River, and adjoining Biscayne Bay

**Lead Agency:** Miami-Dade County DERM

**Contact Name**  Stephen Blair or Susan Kemp, DERM  
**Address**  33 SW 2nd Ave, Suite 1000  
Miami, FL 33130  
**Telephone**  (305) 372-6853 or (305) 372-6855  
**Fax**  (305) 372-6630  
**E-mail**  blairs@miamidade.gov  
  kemps@miamidade.gov

**Action Item Status:**

Miami-Dade DERM has continued to collect monthly water quality samples in the Miami River and its tributaries (including Tamiami Canal and Wagner Creek). During the second quarter of 2003, samples were collected at each of the ten stations in the River on July 8, August 5, and September 9. Costs for sampling (including salaries and fringe and analysis) have been calculated at approximately $320 per station per month. See table provided in the first quarterly report of 2002 for a matrix of parameters collected on the Miami River during DERM’s monthly “Bay Run” and the frequency with which various types of parameters are collected. No sewage spills were reported on or around the River during the quarter. Such notification typically results in additional an emergency sampling response.

See Figures 1 - 3 below for maps showing monthly Total Coliform results from October through December at stations in the Miami River and vicinity. **Figure 4** is a quarterly composite of Total Coliform results from station locations on the Miami River and its tributaries showing how frequently the results at each station exceeded the County standard (1000 cfu/100ml) during the fourth quarter of the year.

Red text colour indicates results that exceed the County Standard (1000 cfu/100ml).
Third and Fourth Quarterly Report, 2003
(July - December)

Action Item:
5. Management
d. Establish standardized water quality tracking for key characteristics

Lead Agency: Miami-Dade County DERM
Contact Name Omar Abdelrahman DERM
Address 33 SW 2nd Ave, Suite 1000
Miami, FL 33130
Telephone (305) 372-6858
Fax (305) 372-6630
e-mail abdelo@miamidade.gov

Action Item Status:
This report presents selected results of the water quality monitoring that occurred in the third and fourth quarter (July through December) of 2003. Due to the extensive nature of the database, it is not feasible to track each parameter collected at each station for the period of record. Therefore, representative stations and parameters have been selected to achieve the objective of this Action Item. Current water quality trends will be tracked by plotting the actual sample results of several key parameters (see Charts 1 – 4 for graphs of ammonia nitrogen, total phosphate, total coliform, and turbidity data) from a station representing the Miami River (MR03) against the same parameters evaluated at another station in adjacent Biscayne Bay (BB22). See maps presented under action item 4.a for station locations. Data collected at both stations during the most recent quarter are plotted in time series along with historic data from the previous ten-year (1993 - 2003) period. For further comparative purposes, the target values developed under Action Item 4.f are plotted, and where applicable, the existing state or county standard for each parameter is shown.
Chart 1.

Ammonia Nitrogen Tracking
Ten Year Period: 1993 - 2003
Second and Third Quarter 2003 Data (July - Dec) Highlighted

- County standard (0.5 mg/l)
- River target (0.06 mg/l = Bay median)
- BB22 (Q4 2003)
- MR03 (Q4 2003)
Chart 2.

Total Phosphate Tracking
Ten Year Period: 1993 - 2003
Second and Third Quarter 2003 Data (July - Dec) Highlighted

River target (0.006 mg/l = Bay median)
BB22
BB22 (Q4 2003)
